

Senior Business System Analyst

Be a part of a highly-specialized team of technology experts at Bravo LT. All Bravo LT professionals hold a bachelor's or master's degree in computer science, information systems, technical communication, communication studies or instructional design. Our team is talented and diverse. We work hard to leverage our skills to strengthen ourselves and those around us.

We are looking for an experienced Senior Business Systems Analyst to help with one of premier clients in the healthcare industry. The bulk of your work will take place in a beautifully renovated building in downtown Grand Rapids, where you will be joined with other team members to tackle complex software initiatives. Knowledge of and experience in an Agile environment is essential.

Responsibilities

- Lead Scrum meetings and daily stand-ups
- Work closely with project managers, developers, QA testers, and stakeholders
- Define functional requirements and technical requirements for custom software application
- Assess user needs and business needs for application development
- Document requirements and user stories into proper technical specifications
- Create and update business process workflow
- Coordinate the implementation of procedures

Skill Requirements

- Exceptional interpersonal communication skills
- Proficient with JIRA or other Agile project tracking systems
- Exceptional technical writing skills
- Strong aptitude in technical complexities
- Ability to identify business, functional, and technical requirements and documenting them into a design document
- Ability to communicate effectively with leads, project managers, developers, testers, and stakeholders

Experience Requirements

- At least 3 years of experience working on an agile software development project
- At least 7 years of experience working as a business analyst formulating requirements

Education Requirements

- Bachelor's degree or equivalent required
- Master's degree or equivalent preferred

Location: Grand Rapids, MI
