

Senior IT Project Manager

Be a part of a highly specialized team of software developers and project managers at Bravo LT. Our employees serve as technical leaders for clients and internal efforts. Our developers and project managers have bachelor and master degrees and come from a variety of organizations, including but not limited to the Chicago Mercantile Exchange, GE, IBM, Gordon Food Service, Amway, ACI Worldwide, and Spectrum Health.

Work in a cross-functional environment in the Enterprise Portfolio Management Office (EPMO), which manages enterprise-wide initiatives as a holistic portfolio. This model allows for a lean approach to strategic decision-making that affects every corner of the organization. The EPMO is a fast-moving, collaborative, and inclusive environment with tremendous growth opportunities, both for your professional development and your career at Bravo LT. We value creativity, change, and healthy skepticism about the status quo.

General Responsibilities

- Overseeing technical integrations as part of a client-wide strategic project portfolio
- Bringing together technical and business resources, assigning responsibilities, and coordinate work
- Developing all project and program documentation (including resource plans, project requirements, scope, and timelines), managing budgets, and communicating with stakeholders
- Adhering to our existing project management methodology and quality standards and ensuring project success at every level
- Leading the work of other project managers, who are responsible for the execution of their project(s) and related impacts on the overall program
- Maintaining a solid understanding of the desired outcomes of your program and projects, and ensuring consistent alignment with business objectives and strategy

Desired Capabilities

- Exceptional communication skills
- Comfortable with fast change and a fair amount of uncertainty
- Collaborators who strive for continuous improvement
- Able to grasp technical concepts required to understand overall project scope and communicate effectively with technical team members
- Eager to develop and expand their knowledge of the client's industry
- Skilled at navigating cross-functional teams and projects
- Qualified to work at the highest levels in all phases of project leadership
- Excellent at motivating team members and providing direction

Basic Qualifications

- PMP certification
- Bachelor's degree or equivalent
- Five years of experience in the field managing a broad range of projects and programs

Preferred Qualifications

- Master's degree or equivalent
- Experience in a project management role that adheres to Project Management Institute (PMI) principles and practices, and which includes: leading multiple moderately-sized project teams of eight or more team members within a matrix organization; supervising or leading resources directly or indirectly in a cross-functional team environment; and projects in multiple technologies and/or business functions
- Previous experience with TriZetto and Cognizant
- Previous experience with managing content based web tools
